Title Guidelines and Checklists for Building CRAN-Worthy Packages

Version 0.1.0

Description Provides essential checklists for R package developers, whether you're creating your first package or beginning a new project. This tool guides you through each step of the development process, including specific considerations for submitting your package to the Comprehensive R Archive Network (CRAN). Simplify your workflow and ensure adherence to best practices with 'packagepal'.

checklist *Check-Lists For Either Building A Package Or Submitting To CRAN*

Description

A check-list of things you should do when building a R package from scratch, or submitting a package to CRAN.

Usage

```
checklist(type = "package")
```

Arguments

type   Load the check-list items for package building (package"), or for submitting to
                CRAN ("CRAN")?

Value

The id of the new container element, invisibly.

Examples

```
checklist("CRAN")
```
